Finishing equipment

The way businesses finish each job reflects their commitment to providing customers with a quality service.

Choosing the right equipment can also help reduce wage costs by achieving the right results more efficiently. The SoftWash® finishing is remarkably quick, and of a very high standard.

Our experienced team are on hand to recommend the right spotting, ironing, form finishing, topper and press to meet the needs of every customer.

We can also put customers in touch with our preferred partner suppliers, if they would welcome an introduction.

DETAILS OF EACH PRODUCT

Spotting table

Basic

Mini-spotting portable unit Mod. Mercury

Mini-spotting portable unit with stainless steel board to be connected to external compressed air supply. It is equipped with product gun with tank and air drying gun

Available extras :

- Mobile support (trolley)
- Kit for second spotting gun

Spotting table

Advanced

Spotting table with stainless steel board Mod. F793

Cold Spotting table composed of a main board and sleeves spotting arm - both stainless steel

It is equipped with:

Two spotting guns with tank for liquid spotting agents

One drying air gun

Available extras :

- Electric vacuum unit foot starter
- Steam spotting gun
- Compressor

Spotting cabinet

Ecological cabinet for PRE and POST spotting Mod. EKO/1

This unit is the ideal solution to improve the quality of your wet-cleaning. This compact and functional unit (100x85 cm) offers both pre and post-spotting facilities in a reduced space .

Pre-spotting unit includes :

one 5 litre pressurised stainless steel soap tank with soap spray gun.

Post-spotting unit includes:

two independent pivoting stainless steel spotting bucks, cold spotting gun with tank and support, air drying gun.

Expert

Available extras :

- Steam/Air gun
- Automatic electronic steam boiler
- Soap tank with spray soap guns
- Cold spotting gun

Ironing table

Basic

Universal ironing vacuum and blowing table, mod. FVC902/S

Electrically heated VACUUM & BLOWING table, either with built-in 5 lt electronic, automatic boiler, or for connection to external steam supply.

Available Extras:

- Swinging arm with sleeve ironing shape or spotting shape
- Steam or steam/air gun or cold spotting gun
- Water spray on iron or water spray gun with support
- Overhead lighting either with or without suspension for iron

Ironing table

Vacuum and blowing table with chimney - with or without boiler - fixed or adjustable height -COLD IRONING - Mod. NOVA PLUS/S

Advanced

Vacuum and blowing table electrically heated with insulated air-vent chimney. STAINLESS steel board allowing COLD IRONING thanks to the anti-condensation buck and special silicon padding. Equipped with a powerful built-in 3Phase vacuum fan. Provision is made for two swinging arms for the finishing board which can be used either side.

A switch can reverse the vacuum/blowing functions of the foot pedals. Fixed board or adjustable height board from 770 to 970 mm by gas spring .

Available extras :

- 5 litre electronic boiler
- Swinging arm with sleeves ironing or spotting shape
- Water spray on the iron or with support
- Steam spotting gun
- Lighting group with or without iron balancer
- Pump with feeding tank

Ironing table

Vacuum and blowing board Mod. TAS-F with or without boiler - adjustable height - PHOTOCCELL activating various operations

Expert

Strong vacuum and blowing table. Buck with internal fiberglass covering and special silicon padding for cold finishing

Vacuum is activated by a photocell while blowing is obtained by pushing a pedal with a foot point.

Finishing performance is very high, the shape is attractive and ergonomically designed.

The buck can be used on either side to finish all kinds of garments, especially trousers. It is also equipped with an air conveyor chimney

Available extras :

- Built-in boiler
- Arms for sleeve ironing and steel arms for spotting
- Pivoting ironing rest
- Support for trousers leg

Form finisher

Basic

Universal form finisher for outerwear garments Mod. M780 - with boiler

Universal form finisher for the blowing finish of all outerwear garments

It is equipped with a 9 litre or a 20 litre boiler capacity, with two different and separate resistance groups for consumption modulation

Finishing cycles controlled by microprocessor. Revolving dummy allows to operate on the garment even during cycles

Available extras:

- Steam iron group
- Steam gun
- Water spray-gun
- Special dummies

Form finisher

Dummy for Form -Finishers Mod. WET - perfect for water washed garments

Dummy for universal ironing . Without bag for a better finishing of the linings and with manual garment stretching. Complete with special clamps and sleeve expanders .

Width of the shoulder frame:
min 35 cm. - max 53 cm.

Height of dummy: cm. 130

Advanced

Form finisher

Tensioning form finisher Mod. M 502, for connection to an external steam supply.

Tensioning form finisher, designed to fulfill demands of a Wet Cleaning pressing system that requires vertical tensioning for perfect seam finishing and fabric "revitalising". It features a special tensioning system for the garment being processed and the powerful hot air flow provides a high class finish. Automatic positioning of the dummy is accomplished using a photocell.

With PLC system as standard allowing up to 10 programs to be customised and saved, a 270° rotating dummy; lateral and rear pneumatic clamps for vents. Using the tensioning form finishers for dry cleaned garments, a very high standard of finish will be achieved. Any final touching-up (if at all) is restricted to very minor details.

Expert

Available options (upon request)

- GFV steam iron assembly complete with ALL STEAM iron for final touch-up

Topper

Universal pneumatic topper Mod. MPT-823/DP2-pneumatic waist and legs tensioning - with special paddles to fix pleats

Universal Pneumatic topper with pneumatic tensioners and special paddles for pleats pressing . Steam heated waist form . Possibility of steaming and blowing before locking of the pneumatic paddles.

Available extras:

- Water spray gun
- Air flow regulation valve
- Manual devices for waist and legs size control
- Clamps for external clamping and internal hem expander
- Super heater for the steam

It is also produced with photocell for automatic alignment of the leg trolley and automatic starting of the cycle.

Ready for connection to steam and compressed air supply.

Expert

Available extras:

- Special device for stretch and pre-set size trousers
- Clamps for external clamping and internal hem expander

Finishing cabinet

Revolving finishing cabinet Mod. Sirio-291

Revolving finishing cabinet provides finishing for any kind of garment :

- jackets, coats, dresses etc. using the former shape;
- trousers, skirts, etc. using the topper shape.

Fully automatic finishing cycle by digital microprocessor.

No need for compressed air for the standard operation.

Available with built-in boiler or ready for connection to an external steam supply.

As an extra, at your request, you can have two jacket shapes or two topper shapes on the same unit.

Plus an extra outside ventilation kit for accurate bag adjustment before the finishing cycle or for brushing operations.

Shirt and form finisher

Shirt and universal form finisher Mod. Easy Form 3000- with or without boiler

Shirt and universal form finisher. Thanks to practical qualities, high versatility and upgraded technical features, excellent finishing results are obtained not only on shirts, white coats and uniforms but also on traditional garments, with a simple reset of the machine. Pneumatic front paddle closing device, with steam heated and vacuum counter-paddle. Manual trolley for the alignment to the shirt hem, complete with two lateral and one rear pneumatic paddles. Pneumatic adjustable clamps for sleeves.

Manual neck locking. Finishing cycles controlled by microprocessor and possibility to work with manual cycles.

Available extras :

- Built-in electronic boiler.
- Water spray gun with support.
- Electric iron for finishing touches.
- Buttoner-post + shirt hanger.

Accessories
